

Hinged Manhole Covers

26 Inch Hinged FRP Manhole Cover

The SMC-2000 26" Traffic-Rated Fiberglass Manhole Cover and frame are composite manhole covers offering a premium alternative to the heavy cast iron manhole frame and cover. This FRP Fiberglass Manhole Cover is ready to replace your missing or stolen manhole covers or lids at an affordable cost.

- Full Traffic Rated Fiberglass Manhole Cover
- 23.62 Inch Clear Opening / 27 Inch Manhole Cover
- ZERO SCRAP VALUE for the would be thieves
- Non conductive
- Non corrosive
- 30 year+ minimum lifespan
- ¼ turn lock keeps the vandals out and the cover in place
- Integrated key and lifting handle
- Cover Only Weighs 65 lbs! (117 lbs total)

The clever 180 degree hinged design of this 26 inch manhole cover allows for safe and easy access to the manhole below. The ¼ turn lock on the manhole cover keeps it securely in place while deterring vandals and scappers. The SMC-2000 hinged fiberglass (frp) manhole cover is composite in construction which means there is ZERO SCRAP VALUE should thieves or scappers try to steal them. After unlocking the cover, the provided key becomes the integrated lifting handle for the fiberglass manhole cover. The replacement or new construction manhole cover itself weighs only 65 pounds and opens a full 180° for safety. The clear opening for this fiberglass manhole cover is nearly 24 inches. The fiberglass manhole frame and manhole cover set can be used on nearly any size manhole using grade rings and adapters.

The SMC-2000 fiberglass manhole cover is fully traffic rated. This 26" manhole cover meets or exceeds traffic load ratings outlined in AASHTO H-20 standards as well as EN 124 Class D400 requirements. As with all of our FRP products, this unit is non conductive, non corrosive and is ideal for use in even the harshest of environments. The finish is UV stable and will not flake or crack. This fiberglass manhole cover and frame is engineered for years of service with a minimum lifespan of 30 maintenance free years.

Applications include Municipal Sewer Systems, Collection Systems, Petrochemical, Water and Wastewater, Gas Utilities, Electric, Underground Substations, Communication Manholes and General Municipal use. Beyond the SMC-2000, ATG offers a [full line of other fiberglass manhole covers and frames](#).
